

T. J. Ransford, **Jensen Measures**, *Proceedings of NATO ASI on Approximation, Complex Analysis and Potential Theory*, N. Arakelian and P. Gauthier (eds.), 221–237, Kluwer Academic Publishers, Dordrecht, 2001.

Abstract

In these notes we describe an approach to potential theory via duality. The key idea is the notion of Jensen measure, an abstraction of the sub-mean-value property of subharmonic functions.
