

# Séminaire d'analyse

Vendredi 17 avril 2015  
14h00

## Conférencière

**Alina Stancu** (U. Concorrdia)

## Titre

**An interplay between convexity and curvature flows**

## **Résumé**

I will talk about a class of curvature flows of interest in imaging whose definition appear naturally in the framework of convex geometry. The main results concern the asymptotic behavior of the flow and, some of them, are joint work with Mohammad Najafi Ivaki.
